WHERE WE'RE LOCATED

Location, location, location.

Ours make for the perfect popcorn, while conveniently offering farmers access to storage and processing facilities right on their doorstep.

We're privileged to be located on the banks of South Africa's largest river, the Orange. Known for its clean, high-quality water, the Orange River provides a consistent supply of water for our crops. Apart from being spoiled with access to water, our location is situated in an area with the ideal climate for popcorn production. The warm, arid conditions we grow our product in provides for a relatively pest-free plant.

Our factory is close to Hopetown, which makes delivery easier and more cost-effective for the farmers growing our popcorn in the area.
